EXAMINER'S AMENDMENT

- 1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 2. Authorization for this examiner's amendment was given in a telephone interview with Attorney of record Bradley D. Lytle on February 21, 2007.
- 3. Claims 13 and 14 depend on claim 1.
- 4. Claim 24 depends on claim 23.
- 5. Claims 2-12, 15-22, and 25-26 have been cancelled.
- 6. In claim 1, delete "a wireless communication system including a plurality of terminals, comprising: an ad-hoc network; a first terminal configured to send, using the ad-hoc network, a signal that includes beacon information having a first identifier that identifies the origin of the sent beacon and a second identifier that identifies an issuing terminal of a certificate of privilege; and a second terminal configured to send, using the ad-hoc network, an authentication request to the first terminal in response to the signal sent from the first terminal by providing the certificate of privilege which matches the second identifier, wherein the certificate of privilege includes encrypted data for

Application/Control Number: 10/784,271

Art Unit: 2617

certifying the second terminal", and insert - - a wireless communication system including a plurality of terminals, comprising: an ad-hoc network; a first terminal configured to send, using the ad-hoc network, a signal that includes beacon information having a first identifier that identifies the origin of the sent beacon and a second identifier that identifies an issuing terminal of a certificate of privilege; and a second terminal configured to send, using the ad-hoc network, an authentication request to the first terminal in response to the signal sent from the first terminal by providing the certificate of privilege which matches the second identifier, wherein the certificate of privilege includes encrypted data for certifying the second terminal, and a certificate-ofprivilege issuing terminal list table for storing a public key certificate of a terminal that has issued the certificate of privilege; authentication-request receiving means for receiving a second authentication request from the first different terminal in response to the authentication request sent from the authentication request means; verification means for verifying a second certificate of privilege contained in the second authentication request received by the authentication-request receiving means by using a public key contained in the public key certificate stored in the certificate-of-privilege issuing terminal list table; and operation-mode checking means for determining, after the second certificate of privilege is successfully verified by the verification means, that the second authentication request is rejected when the operation mode of the different terminal is not permitted by an operable mode contained in the second certificate of privilege--, thereto.

Application/Control Number: 10/784,271

Art Unit: 2617

7. In claim 23, delete "a terminal comprising: a certificate of privilege table for storing a plurality of certificates of privilege indicating an access right of the terminal; a status table for storing an operation mode of the terminal; selection means for providing an instruction to select one of the plurality of certificates of privilege stored in the certificate of privilege table; and sending means for sending a different terminal a signal including beacon information having a first identifier that identifies the origin of the sent beacon and a second identifier that identifies an issuing terminal of a certificate of privilege selected by the selection means and the operation mode of the terminal. wherein the certificate of privilege includes encrypted data for certifying the second terminal", and insert - - a terminal comprising: a certificate of privilege table for storing a plurality of certificates of privilege indicating an access right of the terminal; a status table for storing an operation mode of the terminal; selection means for providing an instruction to select one of the plurality of certificates of privilege stored in the certificate of privilege table; and sending means for sending a different terminal a signal including beacon information having a first identifier that identifies the origin of the sent beacon and a second identifier that identifies an issuing terminal of a certificate of privilege selected by the selection means and the operation mode of the terminal, wherein the certificate of privilege includes encrypted data for certifying the second terminal, and a certificate-of-privilege issuing terminal list table for storing a public key certificate of a terminal that has issued the certificate of privilege; authentication-request receiving means for receiving a second authentication request from the first different terminal in response to the authentication request sent from the authentication request means;

verification means for verifying a second certificate of privilege contained in the second authentication request received by the authentication-request receiving means by using a public key contained in the public key certificate stored in the certificate-of-privilege issuing terminal list table; and operation-mode checking means for determining, after the second certificate of privilege is successfully verified by the verification means, that the second authentication request is rejected when the operation mode of the different terminal is not permitted by an operable mode contained in the second certificate of privilege- - , thereto.

- 8. Dependent claims 13-14, and 24 are allowable for the same reason as set forth above.
- 9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael T. Vu whose telephone number is (571) 272-8131. The examiner can normally be reached on 8:00am - 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Feild can be reached on 571-272-4090. The fax phone number for the organization where this application or proceeding is assigned is 571-272-8300.
